# BACKGROUND

The design was derived from the Ivatt-designed LMS Class 2MT 2-6-0, with a reduced cab to enable it to fit into a universal loading gauge, and other standard fittings, most notably a taller chimney, others including the lack of an Ivatt dome and side plates connecting the two sections of the engine. Like the LMS predecessor the BR design had a tender cab to enhance crew protection and visibility when running tender-first. They were all attached to a BR3 type tender. These locomotives are often known by the nickname "Mickey Mouse"

## SPECIFICATION

Power Classification:	2MT
Build Dates:	1952-1956
Total Built:	65
Wheel Arrangement:	2-6-0
Length:	53 feet 2 ½ inch
Weight:	49 ¼ tons
Number of Cylinders:	2
Cylinder Size:	16 ½ inch x 24 inch
Coal Capacity:	4 tons
Water Capacity:	3,000 imp gal
Boiler Pressure:	200psi
Driving Wheel Diameter:	5 Feet
Tractive Effort:	18,515 lbs
Designer:	R. A. Riddles
