LUNNYE DEVITSY

Intro
Lunnye is a platform game where it is encouraged to explore and interact with the environment. The player must get back to the moon using one of 6 methods. Some of them are very well hidden so good luck exploring.

Controls
Arrow keys move the player. D runs, A jumps. Find the double jump and run powerups! Controllers are automatically detected and enabled.

Options
Open the Ini file to change settings.

NoPost=1 (this will disable post-processing effects)

About
This game was made in Multimedia Fusion by Boss Baddie. It was created in celebration of the 1969 moon landings, even if we were a little late.
The title is a song from Russian band, Mumiy Troll.

Credits
Art, music, coding by James Whitehead
Additional art and testing by Caroline Powrie
