

Hacker Evolution Hardcore Package Part 2 - walkthrough

Level 1: Mainframe Building

Location: Xenti Corporation Mainframe Building

Your objective is to disable all security protecting the building which hosts the Xenti Corporation Mainframe.

A team needs to infiltrate the building and they need a clear path. To help with this one of our members on the inside has leaked us just enough to give us a back door into their systems. We have provided what tools we can and a small pool of money to draw from. That is all we can spare and it is doubtful you can syphon any from Xenti itself during the job.

Good Luck.

Connect overwatch.us

Transfer 1000 (do this ten times.)

Download [retinal_scanner_88.exploit](#)

Download [timezone.taf](#)

Killtrace (do this twice.)

Logout

exec [retinal_scanner_88.exploit](#) [power-control.lan](#)

connect [power-control.lan](#) 88

cat [sync.log](#)

scan [camera-1.xlan](#)

logout

crack [camera-1.xlan](#) 286

killtrace (do this four times)

connect [camera-1.xlan](#) 286

download [switch.ctrl](#)

scan [secure-door-1.xlan](#)

logout

crack [secure-door-1.xlan](#) 486

add [camera-1.xlan](#) to bounce link

crack [secure-camera-1.xlan](#) 9386

remove [camera-1.xlan](#) from boune link

connect [camera-1.xlan](#) 486

cat remote.log
scan motion-sensor.xlan
logout
add camera-1.xlan to bounce link
crack motion-sensor.xlan 128
remove camera-1.xlan from bounce link
connect motion-sensor.xlan 128
cat control.script
scan secure-door-in.xlan
logout

killtrace (do this five times)

add secure-door-1.xlan to bounce
crack secure-door-in.xlan 486
crack secure-door-in.xlan 9386
remove secure-door-1.xlan from bounce
connect secure-door-in.xlan 9386
cat sequence.script
scan guard-interface.xlan
logout

killtrace (do this three times)

add secure-door-in.xlan to bounce
decrypt guard-interface.xlan
crack guard-interface.xlan 11111
remove secure-door-in.xlan from bounce
killtrace (do this twice.)
connect guard-interface.xlan 1111
upload timezone.taf

Level 2: The Mainframe

Location: Xenti Corporation Mainframe

Thanks to our intertion team we have access to Xenti Corporation's Mainframe. Unfortunately the passcodes and encryption has been changed since our break-in, so you will need to break through. When you've done that we can use someone else to make the alterations we need. Just get us through the door.

Time is very limited so you will have to act very quickly.

Always mind your surroundings.

Scan [firewall-guard-1.xlan](#)

Decrypt [firewall-guard-1.xlan](#)

Crack [firewall-guard-1.xlan](#) 24

Connect [firewall-guard-1.xlan](#) 24

Killtrace
