LUCIUS II MANUAL

INTRODUCTION

From the burning wreckage he walked unharmed. He had survived the cold slaughter he put on in his family's estate. He had taken the weak and punished the wicked. He had looked through the peepholes of their souls and found the true selves they were hiding. The book of revelations predict the birth of the child that would end up ruling the world with an iron rod. The first part of this prophecy has been fulfilled. It is time to take care of the rest.

After the leaving Dante Manor, He was taken to ST. Benedict hospitals psychiatric ward. The ways of the wicked are not always easy. Lucifer had decided to create a little challenge for the offspring and took away the boys supernatural abilities. Whispers of a prophecy find their way to the boys ear as he decides to act again and regain his powers. Little does he know about his new advisories.

- Lucius II is a unique twist where you play the bad guy and wreak havoc as the son of the devil.
- 3D Splatter adventure sandbox that continues the story of the original game.
- Over 100 potential victims.
- Lucius can now explore a vast five storey hospital and a small town of Ludlow.
- Homage to the classic horror movies. You can find references to different titles all over the game.
- Create your truly own unique traps by using a complex combination system and various tools.
- Each level is its own sandbox where you can decide when, who and how to kill.
- Create your own unique Lucius by selecting from vast number of supernatural abilities.

HOW TO PLAY

MISCELLANEOUS

Elements

Electricity

There are various items that can conduct or give electricity. When electricity touches an enemy they will electrocute and the electricity will surge out.

Electricity can also trigger conductive items to do various things.

Lucius cannot be harmed by electricity.

Fire

Fire is one of your most trusted ally. Some items may explode from fire and enemies will burn when in contact. Lucius cannot be harmed by fire, as long as there is no large explosion.

Physics

There are three main types of physical objects that can harm enemies and Lucius too. These types are pointed, blunt and sharp. Each type has some unique properties. to them

Liquids

Water

Water is found in blue canisters. It can be used for transporting electricity and putting out fires.

Slippery

Slippery liquids can be used for making enemies slip and fall. There are various ways for them to die after a nice slip.

Flammable

Can be used to transport fire and when fire touches an enemy they will burn.
