

THE GRAY MAN 1.0, FIRST FINAL VERSION

I would like to point out that your antivirus may mark the exe file as a virus, but there is absolutely no risk to your computer. This is because Clickteam Fusion 2.5 is a very old-fashioned engine, and the build of the game is, I don't know how, affected by this as well. I'm very sorry. I'd like to fix it, but I still have no idea how.

The game presents a very strong theme as well as a story that is influenced by serial killers and their actions. The game contains inappropriate scenes that may be too much even for experienced players. Of course, I try to hide this behind pixelated graphics, but it's up to you if you want to give it the right attention.

I agree with the feedbacks that the game can sometimes be confusing in the presented game space. It's all about finding the right compromise, so while I'd like to ask for a little forgiveness, it's a difficult topic to work with. Eventually after a few clicks you can get used to it, but the first time you play it you may be confused.

However, thank you very much for supporting the game and hopefully as its creator I can bring you a very unconventional gaming experience.

Enjoy the ride!
